

Manufacturer of

- Sewage Water Treatment Plant (STP)
- Water Treatment Plant (WTP)
- Effluent Treatment Plant (ETP)
- Industrial RO System (RO)
- Water Softener Plant
- Pressure Booster System

All type of Water & Waste Water Purification & Treatment...

Shreenath Sales and Water Solutions

Sewage Treatment is the process of removing contaminants from municipal wastewater, containing mainly household sewage plus some industrial wastewater. Physical, Chemical and Biological processes are used to remove contaminants and produce treated wastewater (or treated effluent) that is safe enough for release into the environment. A by product of sewage treatment is a semi solid waste or slurry, called sewage sludge. The sludge has to undergo further treatment before being suitable for disposal or application to land.

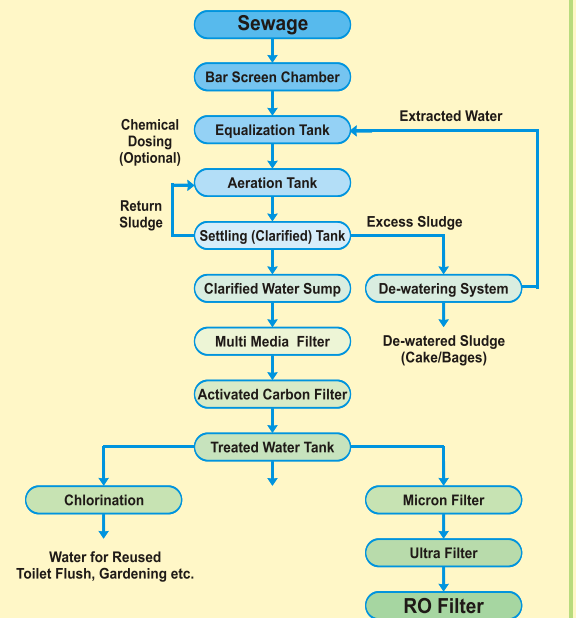

SEWAGE WATER TREATMENT PLANT :

We are a leading manufacturer of Sewage Water Treatment Plant that makes water reusable by removing viruses, bacteria and other impurities present in water. Due to optimum performance and low power consumption, these plants are used in various industry processes. These plants are designed using quality materials thus, ensure long working life to clients.

IDEAL TREATMENT SOLUTION FOR :

- | | | |
|-------------------|-------------|------------------------|
| • Factories | • Workshops | • Industries |
| • Universities | • Resorts | • Hostels |
| • Office Building | • Schools | • Hospitals |
| • Apartments | • Market | • Training Centers |
| • Bus Terminals | • Airport | • Railway Station |
| • Harbors | • Bungalows | • Condominiums |
| • Temples | • Houses | • Commercial Complexes |

BLOCK DIAGRAM :

FEATURES :

- Compact & small footprint compared to other sewage treatment plants.
- Customized designs to meet customers individual requirements.
- Low maintenance, low capital & operating costs.
- Simple assembly and operated by one site labour.
- The system is prefabricated and available from 2 kld to 50 mld.
- Easily transportable to any location unlike other conventional treatment plants.
- Standard pre-fabricated MS construction with ERP coating inside.
- Expandable and flexible designs & minimum maintenance requirements.
- High BOD / COD removal efficiency.
- Treated water reuse in irrigation (gardening) and grey water applications.
- Full technical, installation and operation support from trained and experienced SSWS team. Also providing after sales service with 24x7 available customer care dept.
- Proven Technology with reliable performance and customer satisfaction.
